How to launch EAC Visual Data Blackboard Building Block

EAC Visual Data is a web-based application and a Blackboard building block. It can perform detailed item analysis and validity statistics as well as report student learning outcomes for tests completed on Blackboard. It enables faculty to easily obtain test item statistics that validate student attainment of the learning outcomes, make informed decisions regarding test items and thus student retention.

This tutorial will show you how to launch EAC Visual Data from Blackboard.

1. Click “Add Module” button on the Home tab.

2. On the “Add Module” page click “Add” button under “EAC Visual Data”. Modules are listed alphabetically.

3. Then go back to the Home tab. You will see the “EAC Visual Data” module there. You may need to scroll down to see it. Click the “EAC Visual Data” link to launch the application.

4. The application will open.
