

Airtame Instructions

Rooms: 1C05, 1B04, 2B03, and 3C05

iPhone / iPad:

1. Connect your device to **YCWIFI** and click Forget YCWIFIGuest
2. Touch **HDMI Device** on the touch panel and wait for the projection to show the Airtame display (this takes about 15 seconds).
3. Swipe up on your device and touch **Screen Mirroring**.
4. Select the Airtame that corresponds to your room (ex: if you are in 3C05, select *3C05-Airtame*)

You should now be connected, and everything on your device will show up on the projection screen. Note: you may want to turn off Notifications and iMessage. When you are finished, **DO NOT FORGET** to swipe up and select **Stop Mirroring** to stop displaying what's on your device to the whole class!

Android device:

1. Connect your device to **YCWIFI** and click Forget YCWIFIGuest
2. Download the [Airtame app](#) from the Google Play store.
3. Touch **HDMI Device** on the touch panel and wait for the projection to show the Airtame display (this takes about 15 seconds).
4. Start the **Airtame app** and enter the IP address that is on the projection display screen.

You can now display images or documents from your device. Please note that documents must be in **PDF** format. Also, external SD cards are not supported.

Chromebook:

1. Connect your computer to **YCWIFI** and click Forget YCWIFIGuest
2. Touch **HDMI Device** on the touch panel and wait for the projection to show the Airtame display (this takes about 15 seconds).
3. Download the [Airtame app](#) from the Google Play store.
4. Launch the app and enter the IP address that is on the projection display screen and click **Start**. Next click, **Share**.

You should now be connected, and everything on your device will show up on the projection screen. Note: you may want to turn off any type of pop up notifications. When you are finished, **DO NOT FORGET** to swipe up and select **Stop Mirroring** to stop displaying what's on your device to the whole class!

Mac OS:

1. Connect your computer to **YCWIFI** and click Forget YCWIFIGuest
