I. State Program Mission

The Health Science major will prepare students to serve as expert, committed, culturally competent professionals with a focus on patient care, healthcare delivery, and healthcare management. This will occur through both classroom education and experiential opportunities in the workplace.

II. List Program Goals (PGs) and Program Level Student Learning Outcomes (PSLOs)

Program Goal	Program Student Learning Outcomes
Goal.1 Develop a strong knowledge base regarding biomedical science, health data and quality management, health informatics, and information technology.	Outcome 1.1 Exhibit basic knowledge of healthcare policy, finance and regulatory environments that influence general health care practice.
	Outcome 1.2 Synthesize concepts and principles from sciences and humanities into health science discipline.
	Outcome 1.3 Employ information management systems and emerging technologies to deliver and coordinate care across multiple settings, and communicate health information with individuals and groups.
Goal.2 Obtain appropriate systems-based practice tools and protocols in medical, public health, and healthcare management settings	Outcome 2.1 Provide levels of prevention based on knowledge from theory, evidence-based practice and health science research.
	Outcome 2.2 Apply health science coordinative processes to assist diverse client systems in a variety of settings to achieve optimal health.
Goal.3 Develop the critical thinking and information-mining skills necessary to become lifelong learners.	Outcome 3.1 Critique research findings for applicability for evidence-based health science practice.
	Outcome 3.2 Score within normative data values on Health Science Reasoning Test
Goal.4 Produce well-founded, statistically sound analyses of health interventions, programs and policies.	Outcome 4.1 Initiate quality improvement methods to ensure client safety and improve healthcare outcomes by monitoring, analyzing and evaluating healthcare data within complex healthcare system.
	Outcome 4.2 Participate in efforts to meet emerging health needs through implementation of evolving health science roles.

Program Goal	Program Student Learning Outcomes
Goal 5: Utilize expert communication and collaborative skills.	Outcome 5.1 Use effective oral communication skills with health care providers and patients.
	Outcome 5.2 Develop and demonstrate proficiency in written communication skills.
	Outcome 5.3 Participate collaboratively with other healthcare providers and members of the community in promoting the health, safety and well-being of all.
Goal.6 Exhibit consistently ethical and professional behavior in health care environments	Outcome 6.1 Demonstrate accountability for professional standards of moral, legal and ethical conduct.
Goal.7 Formulate a vision for the future practice of health care and implement plans to realize that vision in the surrounding community.	Outcome 7.1 Conduct themselves in a professional manner interacting members of the healthcare team.
	Outcome 7.2 Demonstrate a concrete understand the NAHQ/NCHEC Code of Ethics
