

Preparing Your Wireless Device

Depending on your device, use any of the below instructions:

1. **Smart Phone / Tablet:** Remove the old **YCWIFI** connections. When you will be on campus connect to **YCWIFI** with your YORK network account (username/password).
2. **Windows Laptop/ MAC Book:** Remove any old **YCWIFI** wireless profile. Download **ClearPass OnGuard Agent** from York College VPN home page. Log in to York College VPN. On home page, click the **York College Aruba ClearPass Agent** bookmark. ClearPass agent download page will appear. Download the agent that corresponds to your device. Install the Agent with all defaults. When you are on campus connect to **YCWIFI** with your York College network account (username/password). Ignore any warning when connecting. (Please note there may be a time delay while the ClearPass agent installs)
