The PROMISE of America...

...the CHANCE for a limitless future
The PROMISE of New York...

...EXCELSIOR, ever upward
The PROMISE of CUNY...

...academic EXCELLENCE and equal access for all
The PROMISE of York College...

...REALIZE your potential as a global citizen and as an individual
Report from the President

The 2016-2017 Academic Year was a banner one for York College as principal among the accomplishments was the institution’s golden anniversary year, filled with celebrations; and a graduating class that was our largest to date.

As will be noted in some of the following pages, the fiftieth anniversary commemoration began with an Executive Leadership Breakfast that featured York’s own in-house historian, Dr. Robert Parmet, a founding history professor and author of the book, *Town and Gown: The Fight for Social Justice, Urban Rebirth and Higher Education*, as well as other early supporters essential to the success of the college. The anniversary also provided an opportunity to host a high-end fundraising gala off-site at Guastivino’s, just under the 59th Street Bridge in Manhattan.

The golden anniversary celebrations were topped off with an exciting graduating class. At 1150-strong, the members of the graduating Class of 2017 are now dispersed throughout the five boroughs of New York City and well beyond as they pursue graduate and professional degrees and career opportunities.

For example, Valedictorian Zalifa Grace Rajendra launched her teaching career pending a graduate degree in Mathematics Education; Social Work graduate Durrell Washington is pursuing the MSW at Columbia University; Reneesia Bailey is in law school at Western New England School of Law in Springfield, Massachusetts; Salim Gnabode is pursuing a Master of Biomedical Science (MBS) at Duke University School of Medicine. Mr. Gnabode will start medical school...
after completing his program at Duke University in the spring of 2018; and Matthew LeBris, a Business major with an entrepreneurship focus, is currently employed at Shark Strategies, a subsidiary of Shark Tank’s Daymond John’s company, Shark Branding.

Also important to note, we were able to complete much-needed upgrades and repairs to the entire campus with a year-long multi-million dollar project. Most of the structures on our campus have been in use for more than 30 years and the elements had taken their toll; so roofing and facades are now new or in other ways, in good repair again.

We are grateful to everyone who supported us over the past year. In addition to research and other funding, we received $577,445.00 in programmatic and scholarship support. If you have not yet supported us, I hope that as you peruse this issue, you will be moved to include York in your philanthropic plans for this year.

Our students, most of them first-generation college-goers, work hard to succeed and appreciate your support. A small number may qualify for Governor Cuomo’s Excelsior Scholarship, but most, even when financially qualified, are unable to participate due to family and other obligations prohibiting them from taking the 30 credits per year mandated by the scholarship.

Thank you for your continued support.

Marcia V. Keizs
York’s 50th anniversary celebrations began with an Executive Leadership Breakfast panel of experts on its history on Friday, September 16 and a block party, alumni art show and dinner dance the following day, Saturday, September 17.

The Breakfast event featured a panel discussion with former New York City Councilman Archie Spigner, who represented York as part of his old district; Ms. Daisy Bernard, a member of the college’s own Class of 1983 and former member of the now-defunct Jamaica Steering Committee; and Mr. Carlisle Towery, former President and CEO of the Greater Jamaica Development Corporation. The enlightening event was moderated by Dr. Robert Parmet of the History and Phi-
losophy department. All four were actively engaged in the fight for York’s survival and campus building during the 1970s.

The Breakfast program entitled, “The History of York College as a Beacon of Jamaica,” broke down the history of the fight for York; and its impact on Jamaica as an educational institution and urban renewal anchor for the area. Spigner used the power of his Council office and City Hall to bring Governor Hugh Carey to tour the downtown Jamaica area – including the empty land mass for the then-proposed York campus. Impressed, the then-governor returned to Albany and signed off on the funding to build York’s campus.

Dr. Parmet, a historian and scholar in US ethnic, immigration and labor history, literally wrote the book on York with his definitive tome, *Town and Gown: The Fight for Social Justice, Urban Rebirth and Higher Education*. Dr. Parmet is the only original professor still on the full-time faculty roster. He served on the planning committee for the anniversary events.

The celebrations continued with a successful 50th Anniversary Gala, at Manhattan’s Guastavino’s. Honorees were the [John] Catsimatidis family, Jet Blue executive Icema Gibbs and pharmaceutical executive, Dr. Ashok Nigalaye. The anniversary celebrations concluded with commencement on June 2, 2017.
Third row, protest walk across the Brooklyn Bridge to City Hall to demand four-year funding, 1977; York students march across Selma’s Edmund Pettus Bridge commemorating the 50th anniversary of Bloody Sunday and the Voting Rights Act, 2015.
York Student Wins CUNY Startups’ Smart Pitch Competition for Mobile App Invention

York business major Matthew LeBris graduated from York College on top of the world, having won one of CUNY’s most coveted awards for its student inventors.

“As for what advice I would give to other students in terms of how to be successful, I share the following points: keep pushing, have faith, believe in yourself, self-educate and don’t let anyone tell you that you can’t.”

—Matthew LeBris

“...and not forget that mentorship to resources. Because of York College, I have landed myself an internship doing Business Development with Daymond John at his marketing and advertising company, “The Shark Group,” that I am looking to turn into a job opportunity. I have been able to live up to my favorite entrepreneurial quote by Gary Vaynerchuck ‘Legacy over Currency,’ by being the President of the Entrepreneurship Club at York for the past year.”

LeBris also explained that “being able to lead great groups of students that share like-minded passions has been everything” he could ask for.

“I have made countless lifetime friends here at York,” he says. “I can’t wait for the day that I achieve the level of success I dream about to be able to give back and continue to create my legacy.”
Accomplished Biology Major Has Big Plans for the Future

Dupah Gobin may have discovered most of York’s extra benefits later in her tenure at the college, but the graduating senior has made up for lost time in remarkable ways.

Arriving at York as a part-time freshman in 2011, Gobin did not know to seek out and take advantage of co-curricular and other opportunities such as clubs, scholarships and mentorships. It wasn’t until her upper junior year that things began to click and she began signing up for such activities as a fully engaged student scholar. Now she not only has an academic mentor, but she is herself a mentor to other students.

“Things would have been so much easier if I had known,” said Gobin, a graduate of John Adams High School in Ozone Park, Queens. “There are so many great opportunities for funding at York. You just have to ask.”

The funding Gobin alludes to includes money to pay for research and internship trips to Brazil, Peru, South Africa, Angola and most recently, to Arizona, where she presented at a conference on the summer research she conducted in Brazil over summer 2017. She also traveled to China, where she attended a different university in each of three cities, focusing on “the arts and cultural aspects.”

Mentored by Dr. Elizabeth Alter, Gobin, who is a biology major, has had a dizzying list of accomplishments in and out of the classroom and labs at York. She is vice president for the Undergraduate Research Club, a vice president in Student Government, and a facilitator in the National Society of Leadership and Success, among others.

Gobin, who is also EMT-certified, plans to attend medical school after graduating from York.

“York College, because of your expertise and guidance, I have a deeper understanding of leadership. I have learned a great deal from you, and your involvement in my professional career has helped me create a successful future.”

—Dupah Gobin

York Biology Major Completes Internship at Yale

Clinton Ehidom is going places. To prove it, the York College junior spent the summer of 2016 getting a head start on the medical career he intends to pursue when he graduates from York College in 2018.

For Ehidom, who began his junior year when most other students born in 1998 were incoming freshmen, the Yale experience was not only rewarding academically, but also reassured him that medicine is indeed his calling. Further, it contributed to his already impressive maturity. The 18-year-old says the six-week Summer Medical and Dental Education Program (SMDEP) at Yale Medical School was a fulfilling experience in every way. He was able to shadow physicians in pediatrics and the emergency room, engage in “a learning curriculum,” have meetings with the deans and faculty of the school, and dorm with medical students.

Born in Imo State, Nigeria, Ehidom arrived in New York at the age of 12 in 2010 and enrolled at York at 16 to study biology with the ultimate goal of becoming a cardiothoracic surgeon. He is a graduate of Fredrick Douglass Academy III in the Bronx, where he said he finished with a C+ average. He now travels an hour and a half by train to York and has a GPA of 4.0 in his major and a 3.97 cumulative average.

Connections at York, which he says he would “choose to attend all over again,” have also been critical to his success. “It has been wonderful coming to York,” says Ehidom. “I have heard of crowded classes at other places. But at York you get to see the professors right away; and I just take advantage of every opportunity.”

Under the mentorship of Prof. Francisco Villegas, Ehidom says his research project, “The Effect of Deep Brain Stimulation on Attention in Rat Model of Alzheimer’s Disease,” involves deep brain stimulation, “a surgical procedure that involves the use of devices to stimulate regions of the brain.” He says “The goal of the project is to investigate the effect of deep brain stimulation on aspects of attention based on the time of administration.”

“It was amazing...the whole program is designed to be challenging and to push you to your limits. I took major classes like physics, organic chemistry, and writing and communications, while having periodic lectures on career development and public health. The whole program was thrilling. It gave me real exposure to medicine, and it definitely diversified my experience.”

—Clinton Ehidom
NEW APPOINTMENTS

Dr. Vincent Banrey Appointed VP of Student Development

Following a national search and approval of the Board of Trustees of the City University of New York (CUNY), Dr. Vincent Banrey was appointed Vice President for Student Development at York College in October, 2016.

However, this was not Dr. Banrey’s first title at York. Before he was appointed vice president, he was Interim Dean of Student Development, having spent more than 30 years in the CUNY system at LaGuardia Community College and Medgar Evers College.

“Dr. Banrey has wide-ranging administrative and managerial experience in student development and is committed to student success,” said Dr. Marcia V. Keizs, president of York College. In his time at York, Dr. Banrey has developed an effective administrative and leadership team through selection and professional development sessions for staff; established mission, goals and assessment strategies for all units under his purview with a goal to improving delivery of services to students; collaborated with the division of academic affairs and other divisions on engagement, retention and academic success of students; and has led the effective working relationship between the student government and administration.”

The beloved student advocate is committed to ongoing professional development for himself and those he supervises and is particularly committed to using theory to guide practice in carrying out the student development mission. His experiences within and outside of York College uniquely position Dr. Banrey to serve effectively and successfully in the position of Vice President of Student Development.

Vice President Banrey earned the PhD in Higher Education Administration from New York University, the MPA in Public Administration from Baruch College, and the BS in Business Administration from the CUNY Baccalaureate Program of The Graduate School and University Center.

New Chief of Institutional Advancement

In the fall of 2016 Mr. Shereitte Charles Stokes, III was appointed Vice President of Advancement at York. Mr. Stokes has wide-ranging experience in Institutional Advancement in Higher Education settings with more than 25 years of experience.

The college looks forward to his contributions honed over 25 years in directing and leading capital campaigns; major gifts and annual fund programs; marketing and communications; government, corporate, alumni and foundation relations; and advancement services. He has raised more than $400 million, and was awarded the fundraising industry’s highest professional designation: Advanced Certified Fund Raising Executive (ACFRE).

Among his previous appointments, Mr. Stokes has served as Vice President for Advancement at Saint Xavier University in Chicago; Vice President of University Relations and Development at Tennessee State University in Nashville; Vice President of University Advancement at Tuskegee University, Tuskegee, AL; and as Associate Vice President of Institutional Advancement at Spelman College in Atlanta.

Mr. Stokes received his B.A. from Wilberforce University in Wilberforce, OH, and holds a M.Ed. degree from the University of Phoenix in Phoenix, Arizona.
York Gets ‘StartUp’ Partner

York College, CUNY recently finalized plans to have York Analytical Laboratories, Inc., an independent testing laboratory of environmental samples including water, soil, and air “for regulated contaminants,” as its first StartUp New York partner.

York Analytical Labs is physically based off-campus in Richmond Hill at York College’s StartUp NY incubator facility, so it enjoys the tax-free benefits of its association with StartUp NY through York College. The college is excitedly looking forward to research and internship opportunities for students in the environmental sciences.

Chosen as one of Governor Andrew Cuomo’s StartUp NY sites, York College chose York Analytical because its interests align with at least two academic programs at the college: earth science and environmental science.

As an Empire State Development Start-Up NY site, businesses expanding in Queens in general and greater and downtown Jamaica.

Advanced manufacturing and tech firms wishing to expand to Jamaica’s tax-free zone (TFZ) have the opportunity to reinvest in their existing businesses in order to grow, free of corporate and personal tax burdens at the state level for 10 years. This is also a prime time and place to launch new ventures with the benefits of this unique program.

“We are excited by this tremendous opportunity,” said Dr. Marcia V. Keizs, president of York College. “We look forward to working with our partners to bring emerging or expanding businesses to downtown Jamaica, Queens and are pleased that we are well on our way toward that goal with York Analytics.”

York Alum Appointed to Major Media Position

Ray Warren, a graduate of the York College Class of 1976 has been appointed president of NBC Universal’s Telemondo Deportes. He is no stranger to NBCUniversal, having served previously as executive vice president for NBC sports.

Warren’s auspicious media career got its start early when he and approximately three other York students founded the York College Radio Station, WYCR in 1974. Warren served not only as an on-air personality at the station, but as the business manager as well. He credits that early experience as the foundation of his successful career as a media executive.

“I learned a lot about being an entrepreneur at York,” said Warren. “I wrote the business plan, did the sales, and the negotiating. I still recall the first three songs I played were, ‘Hear that Music, by Poco, ‘Listen to the Music,’ by The Doobie Brothers and ‘My Music’ by Loggins and Messina,” said Warren.

Now known as YCRadio.org, the online station, which has its physical location in Room 1G06-G of the Academic Core Building, received a generous donation toward the renovations of its studio, from Warren. In 2013 he attended the ribbon-cutting for the space with two of his co-founders, Mike Jacobs and Steve Leszczynski.

In 2014, Warren as well as Jacobs, Leszczynski and Jeff Conecoff, another co-founder, established the WYCR Alumni Excellence in Broadcast Journalism Award. Faculty members in York’s Journalism program also use the radio facility for Broadcast Journalism training.

The media expert, who earned his BA in Communications at York has served on the York College Foundation Board and on the college’s Journalism Advisory Board.
York College Celebrates Golden Anniversary

On the evening of May 10 (2017) York College, CUNY celebrated its golden anniversary with a gala at Guastavino’s, in Manhattan. The honorees were the [John] Catsimatidis family of Red Apple Group; Icema Gibbs, director of Corporate Social Responsibility, Jet Blue Airways; and Dr. Ashok Nigam, most recently the CEO and Chairman of Epic Pharma.

John Catsimatidis is founder, chairman and CEO of Red Apple Group and several other businesses. Mr. Catsimatidis, a 2013 mayoral candidate in New York, is also the host of a radio talk show, “Cats Roundtable;” and publisher of The Hellenic Times, a Manhattan-based publication.

More than 400 guests were in attendance, including former New York Governor David Paterson, political strategist Hank Sheinkopf, PhD an alumnus of the college and Judge George Grasso, a Criminal Court justice in the Bronx and also an alumnus of the
“A half a century mark is a fitting time to look back on our history – one brimming with success stories in keeping with our mission: “To enrich lives and enable students to grow as passionate, engaged learners with the confidence to realize their intellectual and human potential as individuals and global citizens.”

—Dr. Marcia V. Keizs
Commencement 2017

Striding into the enormous tent on the campus’ academic field, the Class of 2017, York’s largest to date, had fulfilled the dreams of parents and grandparents, many of them immigrants, who dared to hope that this generation would carry forth dreams they dared not dream in their day in their native lands.

Commencement 2017 featured 1150 graduates from across York’s three schools and its nearly 50 academic disciplines.

Some graduates, such as valedictorian Zilefa Grace Rajendra, were themselves the immigrants with the dreams for themselves. For Rajendra, her college education was a dream deferred in her homeland of Guyana, South America due to poverty, now proudly realized at York with the help of scholarships and caring mentors.

Rajendra, a Mathematics major, thanked more than her family and college for the accomplishment of her goal. She gave praise to a higher power.
“I want to thank God Almighty for bestowing his blessings on each of us,” said Rajendra, a mother of four. “College was always out of my reach because of financial constraints.”

The keynote address, given by Rosanna Rosado, Governor Andrew Cuomo’s Secretary of State, was inspiring.

“You deserve to be proud. Your degree is a passport to success. It represents the investments you made in yourselves, said Rosado.” “You will now be the voice of your generation. My advice to you is to be in touch with what’s happening in your communities. You are the leaders of tomorrow.”

— Rosanna Rosado

New York Secretary of State Rosanna Rosado.
Families celebrate with their graduates.
Zilefa Rajendra, Valedictorian of the Class of 2017

Sometimes students have the requisite American citizenship but not the required GPA. Sometimes they have the GPA but not the citizenships. Zilefa Grace Rajendra was in the latter category; but she found a way around it and graduated as York’s valedictorian for her Class of 2017.

Only one month into her first semester at York College/CUNY, the Mathematics major was able to nab a $3,000 scholarship from the American Mathematical Society (AMS Awards).

As a non-American citizen Rajendra did not qualify for Thurgood Marshall and many other scholarships available to American citizens. The Scholarship Office had to find an opportunity which had no citizenship qualifier.

And then the Math Department found one.

“Professor (Rishi) Nath came across this scholarship and sent it to the Scholarship Center,” Rajendra explained of her stroke of good fortune. “I didn’t have to be a citizen to qualify. And I hadn’t even taken a class with Professor Nath yet.”

The American Mathematical Society (AMS Awards), “the nation’s largest mathematical organization,” are intended to help talented students pursue their undergraduate studies in mathematics.

And with that first scholarship, the stage was set for Rajendra not only to remain in college, but to graduate at the top of her class.

“Persistence paid off,” said Rajendra. “I’m just very grateful to everyone.”

The math scholar went on to earn other scholarships to fund her education, including a $10,000 Con Edison scholarship.

At Commencement, Rajendra was surrounded by her supportive husband, children and mother. Her valedictory speech thanked a dizzying list of professors, administrators and fellow-students, whom she acknowledged may have had it even more difficulty that she did.

“While it was not an easy journey for me, I believe it was a more difficult journey for you who worked two or three jobs to make ends meet,” said Rajendra. “Many of you are single parents or children helping your parents. I don’t know how you did it, but I stand in awe of you.”

Zilefa has postponed graduate school to immediately launch her teaching career. She plans to pursue a graduate degree in middle school mathematics education next year.
Just a few facts...

On October 24, 1966, CUNY voted to create a fifth senior college, designated as Alpha College, to serve the city’s growing student population. Its first president, Dr. Dumont F. Kenny, renamed the school York College.

NO. 1

YORK COLLEGE was recognized for two consecutive years for graduating students with the lowest debt in a nationwide survey. *The Institute for College Access & Success, 2014-2015.*

Today more than 55% of full-time UNDERGRADUATES attend tuition-free

over 29,000 GRADUATES to date
OUR STUDENTS, from at least 125 different countries of birth, speak more than 80 native languages.

York College Student Body by New York City Boroughs

IN THE EARLY DAYS while York moved around Queens searching for a permanent home, they were known as the NOMADS. When they found a home in Jamaica they became the CARDINALS (a bird that doesn’t migrate!)

Over 600 full & part-time faculty.

51% of York employees live in Queens.

8,360 STUDENTS

YORK COLLEGE ENROLLMENT 2016-2017
York College gratefully acknowledges the following donors who have made generous commitments of $100 or more over the past fiscal year. We thank you for your much-needed support to our institution. Your gifts allow us to provide scholarships and other critical funding for our students so that they too may realize their dream of a quality higher education and successful careers:
